

Rule Sheet - *Surf n' Turf*

Welcome to *Surf n' Turf*, a fast-paced tower defence game where strategy and timing are key! The peaceful country of **Clearwater** is under attack. Radioactive fish are invading the river, threatening to pollute the nation's only clean water source. It's up to you to build defences, manage resources, and stop the swarms before they reach open waters!

Objective

-  Defend Clearwater's clean water by stopping all waves of radioactive fish.
-  If 100 fish reach the clean water, the ecosystem collapses, and the game ends.

How To Play

-  Click preset tower spot to choose tower type and view its cost and stats before placement.
-  Purchase new towers or upgrade existing ones for better range, speed, and damage.
-  Defeat fish to earn fish scales, your main currency for buying and upgrading towers.
-  Each wave brings tougher enemies, new fish types, and surprise events.
-  As waves progress, dams burst to open new paths, forcing you to adapt your defence.
-  Defeat the colossal Radioactive Swarm at the end to save Clearwater once and for all!

Controls

-  **Mouse Left Click:** Interact with tower placement, upgrade, and settings UI.
-  **W / A / S / D:** Move the camera view to see more of the map.
-  **Q / E or Scroll Wheel:** Zoom in and out of the map.
-  **Esc:** Pause and open the menu.

Towers & Abilities

Bird Tower

-  High cost and long-range.
-  Upgrades increase range and add more birds (1 → 2 → 4).
-  Great for covering wide areas and thinning out swarms and fast enemies.

Bear Tower

-  Medium cost and high power.
-  Eats many fish within range.
-  Upgrades increase damage and range, ideal for clustered enemies.

Fisherman Tower

-  Low cost, tactical utility.
-  Throws nets that catch fish for a short time, slowing and eventually capturing them.
-  Upgrades improve net size and duration, and let other towers attack faster.

Economy

-  **Fish Scales:** Earned by defeating fish; spent to place or upgrade towers.
-  **Refund System:** Sell towers for a 50% scale refund.
-  **Strategic Spending:** Balance between upgrading towers and saving for stronger ones later.

Enemy Types

-  **Basic Fish:** Slow and weak, appear in early waves.
-  **Fast Fish:** Move quickly; require well-placed nets or rapid towers.
-  **Hidden Fish:** Only visible to upgraded towers.
-  **Swarm Enemies:** All fish-type enemies can appear in swarms. The number of fish equals the enemy's total health, and every fish in the swarm must be defeated to eliminate the target.
-  **Final Boss Swarm:** A massive, slow-moving radioactive clump; your ultimate challenge!

Scoring

Your Final Score Is Based On:

-  Remaining clean water health
-  Total fish defeated
-  Scales saved at the end
-  Time taken to clear all waves

Tips For Success

-  Plan tower placement before starting each wave.
-  Mix tower types; synergy between nets, claws, and birds is key!
-  Don't upgrade everything at once, instead, save for critical moments.
-  Watch for enemy hints, sound, and visuals that warn you of changes.
-  Save your strongest defences for the final boss wave.
